PROFESSIONAL SUMMARY

Detail-oriented Cybersecurity student specializing in Ethical Hacking and Digital Forensics with hands-on experience in system monitoring, vulnerability assessment, and threat analysis. Skilled in analyzing network activity, identifying security risks, and working with tools like Nmap and Wireshark in controlled environments. Strong focus on security documentation, log analysis, and research on emerging threats. Seeking to contribute to real-world security operations through monitoring, risk detection, and implementation of best practices.

TECHNICAL SKILLS

Cybersecurity: System Monitoring, Vulnerability Assessment, Threat Detection, Network Security, Risk Analysis, Phishing Simulation

Tools: Nmap, Wireshark, Burp Suite, Nikto, Nessus, Metasploit (Basics)

Technical Knowledge: TCP/IP, HTTP/HTTPS, DNS, Linux, Windows

Programming: Python, C/C++ (Basics), SQL (Basics), Bash (Basics)

Other: Log Analysis, Security Documentation, Research & Reporting

EDUCATION

Yenepoya University, Bengaluru 2023 – 2026
Bachelor of Computer Applications — Cybersecurity, Ethical Hacking, Digital Forensics
CGPA: 9.4 / 10

MSS Public School, Calicut 2019 – 2021
Higher Secondary — 80%

Sacred Heart HSS, Kannur 2018 – 2019
SSLC — 99%

WORK EXPERIENCE

Cybersecurity Researcher & Developer
ZecurX Cybersecurity Pvt Ltd Oct 2025 - Mar 2026

- Conducted research on 10+ attack vectors, improving threat analysis documentation efficiency by 25%
- Analyzed security risks and contributed to structured vulnerability reporting
- Supported teams with insights on threat detection and system security improvements

Offensive Cybersecurity Intern
InLighnX Global Pvt Ltd Jun 2025 – Aug 2025

- Performed network reconnaissance, port scanning, and attack surface mapping
- Assisted in vulnerability research and penetration testing in lab environments
- Used security tools to identify risks in systems and applications

Cybersecurity Intern
Corizo Dec 2023 – Jan 2024

- Conducted vulnerability assessments and basic security checks

- Documented findings and recommended risk mitigation strategies
- Gained exposure to real-world security workflows and reporting

PROJECTS

AIDER — Intrusion Detection & System Monitoring Tool

- Developed Unix-based tool for process monitoring and suspicious activity detection
- Analyzed system behavior to identify anomalies and potential threats

NetRecon — Network Reconnaissance Tool

- Automated detection of live hosts, open ports, and services
- Integrated Nmap for TCP/UDP scanning and service identification

WiBreak — Deauthentication Simulator (GUI)

- Built wireless attack simulation tool for educational environments
- Designed modular execution framework for controlled testing

QRPhish — Phishing Simulation Toolkit

- Developed QR-based phishing simulation for awareness training
- Demonstrated real-world attack vectors in controlled environments

ObfusPro — Payload Obfuscation Toolkit

- Implemented XOR and Base64 obfuscation for security research
- Focused on understanding evasion techniques in lab environments

CERTIFICATIONS

- Google Cybersecurity Professional Certificate (2025)
- Cisco Network Security (2024)
- Ethical Hacking Essentials – EC Council (2024)
- Certified Cybersecurity Educator Professional – CCEP (2025)
- Fundamentals of Cybersecurity (2023)

ACHIEVEMENTS

- Top 10 — IBM National Hackthon 2026
- 1st Prize — Enigma Project, Yeniot Tech 2025
- 1st Prize — Cybersecurity Poster Presentation, IBM ICE Day 2024
- 2nd Prize — Technical Paper Presentation, IBM ICE Day 2025
- 5th Rank — Triada CTF 2025

SOFT SKILLS

Analytical Thinking, Attention to Detail, Problem Solving, Team Leadership, Documentation & Reporting, Team Collaboration, Time Management
