PROFESSIONAL SUMMARY

Motivated and Detail-oriented BCA student specializing in Cybersecurity, Ethical Hacking, and Digital Forensics. Proven ability to develop Python-based security tools, conduct vulnerability assessments, and contribute to research and strategy. Award-winning researcher actively seeking internship or entry-level roles in global organizations.

EDUCATION

Yenepoya Deemed to be University, Bengaluru, Karnataka | 2023 – Present

- Bachelor of Computer Applications – Cybersecurity, Ethical Hacking, Digital Forensics
- CGPA: 9.04 / 10 (Till Semester 4)

MSS Public School, Calicut | 2019 – 2021

- Graduated with 80%

Sacred Heart HSS School, Kannur | 2018 – 2019

- Graduated with 99%

WORK EXPERIENCE

Cybersecurity Researcher & Developer (Intern) -ZecurX Cybersecurity Pvt Ltd | Hybrid Oct 2025

- Conducted cybersecurity research on market trends, threat landscapes, and competitor analysis.
- Authored research papers and internal reports supporting product strategy and business growth.
- Contributed to security tool feature research and roadmap planning.

Offensive Cybersecurity Intern - InLighnX Global Pvt Ltd | Remote Jun 2025 – Aug 2025

- Performed ethical hacking, threat modeling, and offensive security tasks.
- Assisted in penetration testing and vulnerability research using Python and security frameworks.

Cybersecurity Intern - Corizo | Remote Dec 2023 – Jan 2024

- Conducted network reconnaissance, port scanning, and foundational security analysis.
- Documented findings and suggested risk mitigation measures.

PROJECTS

QRPhish – QR Code-Based Phishing Toolkit

- Developed a Python-based toolkit to generate and track QR-code phishing campaigns in controlled environments.

NetRecon – Network Reconnaissance Tool

- Built a network scanning tool for port enumeration, service detection, and vulnerability lookup using the NVD API.

Cybersafe – Multifunctional Cybersecurity Toolkit

- Developed Python-based tools for IP tracking, email spoofing detection, hash generation, and port scanning.

AIDER – Advanced Intrusion Detection and Enhanced Review

- Created a Unix-based auditing tool for system integrity checks, process monitoring, and intrusion review.

Enigma – Advanced CLI-Based IoT Security & Automation System

- Designed a command-line IoT security system using ESP32 NodeMCU with RFID/NFC-based access control.

TECHNICAL SKILLS

- Cybersecurity Skills:** Threat Analysis, Incident Response, Network Security, Vulnerability Assessment, Log Analysis, Social Engineering Awareness, Penetration Testing, Vulnerability Research, Threat Modeling, Phishing Simulation, Network Reconnaissance, Risk Assessment, Compliance Analysis, Threat Landscape Research, Security Documentation, Policy Review
- Programming & Tools:** Python, SQL, Bash, HTML, CSS, Power BI, Microsoft Excel, Kali Linux, Parrot OS, Metasploit Framework, OWASP ZAP, Burp Suite, Nmap

INTERPERSONAL SKILLS

- Project Management, Critical Thinking, Problem Solving, Team Collaboration, Time Management, Communication, Leadership, Investigative Research, Analytical Thinking, Decision-Making, Adaptability, Organizational Skills

ACHIEVEMENTS

- 1st Prize – Cybersecurity Poster Presentation, IBM ICE Day 2024
- 1st Prize – Enigma Project, Yeniot Tech 2025
- 2nd Prize – Technical Paper Presentations, IBM ICE Day 2025
- 5th Prize – Triada CTF 2025

CERTIFICATIONS

- Google Cybersecurity Specialization
- Fundamentals of Cybersecurity
- Cisco Network Security
- Ethical Hacking Essentials(EC-Council)
