EDUCATION

YENEPOYA DEEMED TO BE UNIVERSITY

- Bengluru, Karnataka 2023 - Present**
- Bachelor of Computer Applications
 - Cybersecurity, Ethical Hacking, Digital Forensics

MSS PUBLIC SCHOOL, CALICUT

- Graduated with 80% 2019-2021

SACRED HEART HSS SCHOOL, KANNUR

- Graduated with 99% 2018-2019

TECHNICAL SKILLS

- Threat Analysis, Penetration Testing
- Network Security
- Social Engineering Awareness
- Python, HTML, CSS
- SQL, Bash
- Kali Linux, Parrot OS
- Metasploit Framework
- OWASP ZAP, Burp Suite, Nmap.
- Power BI, Microsoft Excel.
- Security Assessment Reporting, Technical Documentation.

INTERPERSONAL SKILLS

- Project Management & Planning.
- Critical Thinking & Problem Solving
- Teamwork
- Time Management
- Leadership
- Effective Communication Skills
- Analytical Thinking & Collaboration
- Decision-Making
- Adaptability
- Organizational Skills

CERTIFICATION

- Google Cybersecurity Specialization
- Fundamentals of Cybersecurity
- Cisco Network Security

SUMMARY

Motivated and detail-oriented BCA student specializing in cybersecurity, with hands-on experience in ethical hacking, digital forensics, and threat analysis. Skilled in identifying vulnerabilities, analyzing threats, and supporting secure system operations. Known for a strong analytical mindset, teamwork, and proactive problem-solving. Committed to continuous learning and eager to contribute to protecting organizational assets and enhancing cybersecurity initiatives in a dynamic professional environment.

PROJECTS

QRPhish - QR Code-Based Phishing Toolkit

- Developed a Python-based offensive cybersecurity toolkit to generate and track malicious QR codes, automate payload delivery, and simulate real-world phishing attacks for security awareness and testing purposes.

NetRecon - Network Reconnaissance Tool

- Built a cross-platform network scanning and reconnaissance tool to perform port enumeration, service detection, vulnerability lookup via NVD API, and automated report generation for penetration testing and red teaming.

Cybersafe - Multifunctional Cybersecurity Toolkit

- Developed a Python-based toolkit integrating key security utilities including IP tracking, email spoofing detection, hash generation, and port scanning. Designed for ethical cybersecurity analysis and awareness.

Aider - Advanced Intrusion Detection and Enhanced Review

- Developed a Unix-based security auditing and vulnerability assessment tool to automate system integrity checks, process monitoring, and multi-format report generation across macOS, Kali Linux, and Parrot OS.

Enigma - Advanced CLI-Based IoT Security & Automation System

- Developed a command-line interface (CLI) tool using ESP32 NodeMCU to enhance the security and automation of IoT devices. Integrated RFID/NFC for secure access control, real-time event logging, IR/RFbased automation, and wireless attack simulation.

ACHIEVEMENTS

- 1st Prize - Cybersecurity Poster Presentation IBM ICE DAY 2024
- 2nd Prize - Technical Paper Presentations IBM ICE DAY 2025
- 3rd Prize - Yen IOT TECH 2025
- 5th Prize - Triada CTF 2025
